+91 7624815964 - [Github](#) - [LinkedIn](#) - [Gmail](#) - [HackerRank](#) - [Portfolio](#)

SKILLS

Technical Skills:

1. Programming :

C++ , Python (basic), SQL, DSA(C++)

2. Database :

DBMS, Mysql

3. Cloud :

AWS (basic)

4. Data & Analytics :

Tableau Public, Hadoop, Data visualization

5. Web Technologies:

HTML, CSS, Javascript (Basic)

Technical Tools:

1. Git
2. Github
3. VS code
4. Streamlit

PROJECTS

1. AI-DRIVEN SKIN CANCER DETECTION | Final Year Project (in progress)

Key Contributions:

- Developing an AI-based system for early skin cancer detection.
- Uses image preprocessing and deep learning techniques.
- Building a user-friendly web interface using Streamlit.
- Focused on improving detection accuracy and accessibility.

Tech Stack: Python, Deep Learning model - CNN, Streamlit, Machine Learning

2. VERISCAN: AI-Powered Fake Profile Detection System | Hackathon project

Github - [click here](#)

Key Contributions:

- **Developed a machine learning-based fake Instagram profile detection system** by analyzing profile and behavioral features to classify suspicious accounts using probability-based risk scoring.
- **Built an interactive Streamlit web application** for real-time profile risk assessment, enabling users to evaluate account authenticity through an intuitive dashboard.

Tech Stack: Python, Streamlit, Scikit-learn, Pandas, NumPy, Machine Learning, Joblib

3. Personal Portfolio Website | HTML, CS, Javascript

Github - [click here](#)

Live Demo - [click here](#)

Key Contributions:

- Developed a responsive personal portfolio website using HTML, CSS, and JavaScript.
- Designed a clean interface to showcase projects, technical skills, education, and certifications.
- Implemented smooth scrolling, interactive animations, resume download, and contact form validation.
- Structured the application with reusable, maintainable code for future enhancements.

4. MINIGIT | Git-Inspired Version Control System

Github - [click here](#)

Key Contributions:

- Developed a Git-inspired Version Control System in **C++**, implementing repository initialization, file staging, commit history, checkout, and status tracking using OOP and file handling.
- Designed a **Python Streamlit** graphical interface to execute version control operations, visualize repository status, and display real-time command outputs through an intuitive dashboard.

Tech Stack: C++, Python, Streamlit, Git

EXPERIENCE

1. Participant at Sandbox Hackathon – Dayananda Sagar University (2026)

- Participated in hands-on technical learning activities.
- Collaborated with peers on technology-driven solutions.

2. Co-ordinator in Code Carnage & Code Carnage 2.0 - CSE(DS), SJBIT

3. Head Girl in School - Kendriya Vidyalaya (2021-22)

ACHIEVEMENTS

1. Passed NPTEL COURSE with Silver Elite. (Course - Human Computer Interaction)

CERTIFICATES

1. [Business Intelligence and analytics](#) - NPTEL

2. [Human Computer Interaction](#) - NPTEL

EDUCATION

1. KENDRIYA VIDYALAYA NO. 1, FBD, HARYANA

10th - 82.8 % (2020)

12th (PCM)- 69.2 % (2022)

2. SJBIT , KARNATAKA

B.E. in CSE(Data Science) (2023 - present)

Current C.G.P.A. - 8.43
